

We, the undersigned, oppose the continued militarization by the US government of its foreign and domestic policies on behalf of the military and prison industrial complexes for the benefit of transnational corporations. June 28 marks the sixth anniversary of the US-supported military coup in Honduras, a country that exemplifies the moral bankruptcy of this policy, and serves as a warning for what is happening in our own communities. We demand:

1. End military and police training and aid to Honduras, Central America, and the militarization of US local police forces.
2. Close the infamous School of the Americas (Western Hemisphere Institute for Security Cooperation).
3. Demilitarize the Drug War at home and abroad and pay reparations to the families of those murdered by a DEA operation in Ahuas, Honduras.
4. Dump the Alliance for Prosperity which will only increase militarization of Central America, and increase human rights violations and pressure on people to migrate.

NO TO MILITARIZATION
